SKILLS

HTML5	Haml	Responsive Web Design
CSS3	Sass/SCSS	jQuery
SVG animations	Bootstrap	Zurb Foundation
Sublime Text	Git	Photoshop
WordPress	Joomla!	Drupal

EXPERIENCE

Wayfair

06 / 2016 - Present

Front-End Engineer

- Build clean, elegant HTML/Sass code in support of Wayfair's 5 E-commerce sites, internal applications and supplier extranet.
- Responsible for new code development, existing code optimization, browser performance and page rendering
- Interact with business Product Managers and Designers to build requirements
- Complete project tasks / tickets in a timely fashion in a fast-paced, high volume environment.

MeYou Health

01 / 2013 - 03 / 2016

Front-End UI Engineer

- Accurately translated design mock-ups and style guides into engaging user interfaces using Haml, Sass, Bootstrap, jQuery
- Worked collaboratively with designers, Ruby on Rails engineers, and product managers to create fully responsive web applications
- Implemented a maintainable Sass architecture consisting of scalable and modular code
- Ensured application efficiency for cross-browser compatibility and performance
- Worked in an agile development environment, which included daily scrums, sprint planning, design meetings and retrospectives

The District Management Council

04 / 2011 - 01 / 2013

Web UI Designer/Developer

- Collaborated with developers, stakeholders and product managers to develop wireframes, usability and the product experience for our Ruby on Rails web applications
- Designed the identity and user interface for suite of District Management Council web applications (dmDevelop, dmDashboard, dmPlanning)
- Focused on the development of web applications using Front-End technologies, Haml, SCSS, Bootstrap and Foundation
- Participated in an Agile environment with multidisciplinary teams, which included daily scrums, iteration planning, and pair programming with developers
- Accurately estimated user story delivery time using Pivotal Tracker
- Conceptualized and led the redesign of The District Management Council's client facing website

Sound & Vision Media

05 / 2006 - 04 / 2011

Web Designer/Front-End Developer

- Developed websites using XHTML/HTML5, CSS, JavaScript, WordPress, Drupal, Joomla! and Adobe Flash
- Designed engaging user interfaces for a diverse variety of clients
- Created information architecture and user experience documentation (site maps, wireframes)
- Utilized web standards, accepted best practices, and cross-browser consistent code
- Worked directly with clients to gather information and determine their needs and expectations

Ziff Davis Enterprise

09 / 2007 - 08 / 2008

Web Designer/Front-End Developer

- Designed and developed the WebBuyersGuide.com online marketing materials such as e-mails and banner advertising
- Worked with web developers to maintain graphic consistency from approved designs
- Responsible for HTML/CSS development of WebBuyersGuide.com
- Designed and produced custom micro-sites and landing pages for clients such as Dell, CDW, Toshiba
- Worked closely with the Audience Development and Marketing team to contribute to the company's strategy for interactive and online marketing
- Established and managed design project time lines and deliverable schedules

E D U C A T I O N

General Assembly

2014 - 2014
